

Strategic IT Governance:

Aligning IT with Business Goals

This 2-hour workshop on IT Governance is structured into three comprehensive modules, designed to provide participants with a foundational understanding of IT governance principles, frameworks, and their application in real-world scenarios.

Module 1: Introduction to IT Governance

Explores the importance of IT governance in aligning IT strategy with business objectives, the role of leadership, and an overview of key frameworks.

Module 2: Frameworks and Best Practices

Dives into the specifics of widely adopted frameworks, detailing their components, implementation strategies, and how they support compliance, risk management, and business growth.

Module 3: Implementing IT Governance

Focuses on practical aspects of applying IT governance principles, including case studies, developing an IT governance roadmap, and strategies for stakeholder engagement and continuous improvement.

The workshop aims to equip IT leaders and professionals with the knowledge and tools needed to effectively govern IT resources, manage risks, and ensure that IT supports the broader business goals.
